senator®
Extramoredinary. Since 1920.

MORE SENATOR. MORE YOU.

MORE SENATOR. MORE YOU.

senator® products stand out because they represent a thorough concept targeting individualised brand presentation: a broad range of designs, dependable production and customised printing mean they offer a perfect match with your brand.

MADE IN GERMANY

Quality made in Germany: since 1920
Our value chain within Germany and our many years of production know-how are your assurances for long life products to achieve advertising success.

Individual production and speedy delivery
Our closeness to the market and our technical possibilities mean we can respond both flexibly and very quickly: also to your short-term needs.

Perfect print technology for every brand identity
The full range of spectacular printing options for our writing instruments and mugs are the guarantees to provide the best presentation for your brand identities.
We can help you in selecting the most suitable branding options, and design your promotional items to leave lasting impressions.

Strong promo articles on desktops
senator® ball pens and cups are the perfect accompaniment during everyday work. They boast persuasive functionality to help them quickly become products which are used every day, providing the ideal vehicle for advertising logos again and again, day by day.

We accept responsibility for your safety
We produce with care and passion. That is something you can depend on. Senator® products are always the safe choice and fulfil all legal requirements. To us, the BSCI and Sedex membership is as self-evident as the certification according to ISO 9001, 14001 and SMETA.

Durable products and sustainable processes
We attach great importance to the environment. That's why our materials and production processes are designed to be free of harmful substances, ecologically compatible, waste avoiding and recyclable. We purchase green electricity from hydropower, invest in energy-saving measures and develop our products in such a way that they have a long product life.

NOTEBOOKS

The new senator® notebooks are practical companions in daily life. Handy in size, functional in design with pleasant soft surfaces. The customer logo can be printed or embossed with sufficient space on the front or back. And of course, your individually selected writing instrument can be easily accommodated in each of these books.

SENATOR SERVICE FOR YOU.

Our products are the vehicles for individual advertising concepts. We would be happy to provide support for your projects as well: with our products, with personal consultation and creative support as well as our speedy delivery service.

Use strong design suggestions for persuasion
You'd like to present your customers attractive design proposals for their projects?

Our visual service is the ideal partner. Send us a logo, tell us your requirements and we'll do the rest. We will send you a presentation reflecting your requirements for presentation to your customer.

Upon request we can also help make the product choice and also provide all creative work needed. Simply get in touch.

OUR FAST DELIVERY SERVICES

Our guarantee for quick deliveries
You, too, can benefit from the advantages of the unique senator® "5000 in 5" services. All of your orders for volumes of up to 5,000 pieces will be produced within 5 days, including up to 5-colour printing, packaging and ready for dispatch. All at no extra charge. That is the service we offer you.

5000 IN 5 | MADE IN GERMANY

5,000 PENS IN 5 DAYS

- 5 days production period from approval of the position sketch
- up to 5,000 pens
- up to 5-colour printing (1 print position, branding methods A and C)
- valid for all colours of the respective model
- all models with choice of blue or black ink

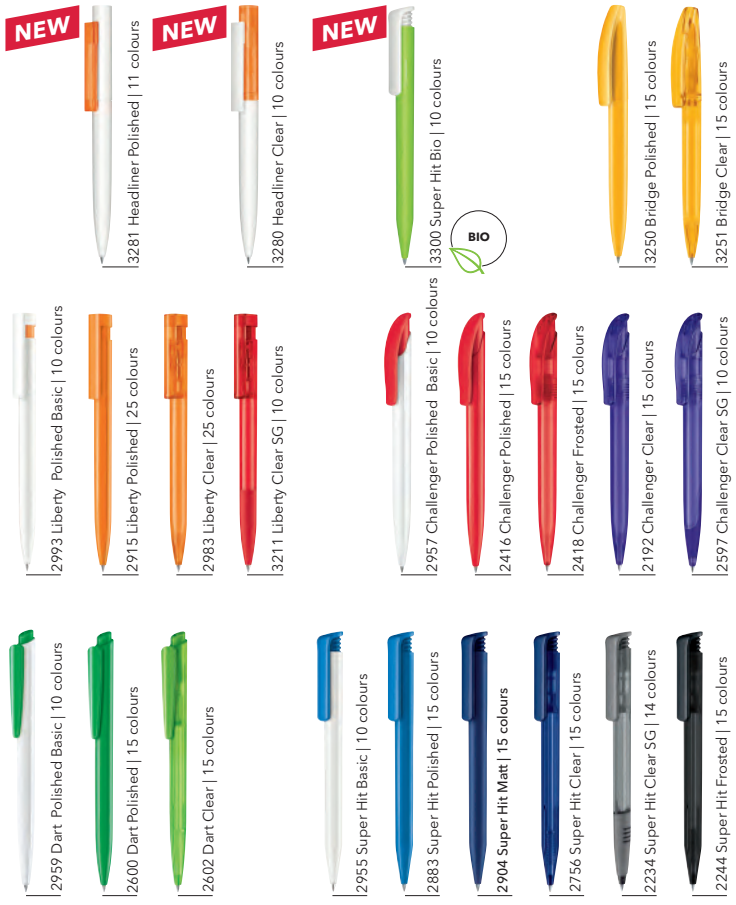
For extra fast deliveries
We can now satisfy even the most express orders for our customers. Up to 1,000 ball pens, with digital print on clip or barrel are ready to dispatch within just 2 days.

EXPRESS | MADE IN GERMANY

1,000 PENS IN 2 DAYS

- only 2 days production time from approval of position sketch
- 500 to 1,000 ball pens
- Including digital clip print
  OR
  Inkluding digital barrel print
- blue refill
- valid for the colours:
  white, black, yellow 7408, orange 151, red 186, blue 2757 and blue 2935
  (colour for Super Hit Bio see below)

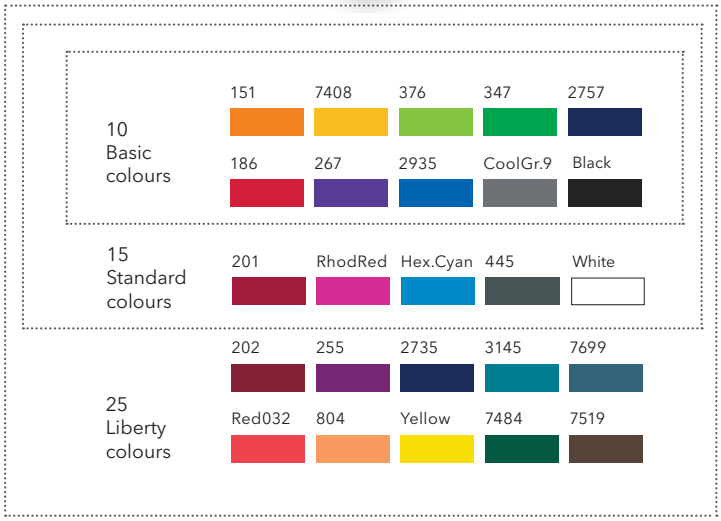
5,000 IN 5 MODELS



PEN EXPRESS MODELS

OUR COLOURS FOR YOUR SUCCESS.

With senator® your corporate colour is in safe hands. The colours available for senator® ball pens offer a broad choice of surfaces and models. This gives more flexibility when selecting the best promotional ball pen to perfectly fulfil your needs.



10 BASIC COLOURS

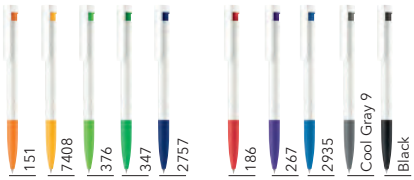
Our basic models offer a combination of white with various colour accents. These basic models, as well as our transparent Hattrix and Liberty models with soft grip zone are available in our top 10 colours.

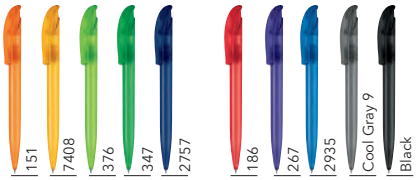
15 STANDARD COLOURS

In order to ensure you have the biggest possible choice and comparison, most of our plastic ball pens are available in our 15 standard colours per surface.

25 LIBERTY COLOURS

Our successful Liberty model also has an unbeatable colour range. In addition to the 15 standard colours, Liberty is available in 10 additional transparent or opaque barrel colours.





LONG-TERM COLOUR GUARANTEE

We guarantee that our 15 standard colours will be available unchanged in the years ahead. You can depend on being able to make follow-up orders in the future for many years from the senator® range for your original colour tone choice.

PMS SERVICE MUGS

Bring your corporate colour to life with our Colour4U service. Tell us your desired colour and we will dye the exterior of your chosen mug to create the perfect eye-catcher.

We hold a large variety of both ceramic and organic (Polylux) colours to choose from. This service is available on all senator® white porcelain mug ranges, except for sets.

We will be happy to assist you with the selection of your colour.

CERAMIC COLOURS
Ceramic colours bond with the mug's surface at temperatures of more than 800° C. This makes them extremely long lasting. However, owing to the substances ceramic colours are made of, it is unfortunately not possible to offer every imaginable colour. These colours are suitable for use in standard dishwashers.

POLYLUX COLOURS
Polylux (organic) colours can achieve an incredibly broad colour range. For all colour shades that cannot be achieved with ceramic colours, our polylux colours are the right choice. Please note that these colours only tolerate lower burning temperatures and are therefore not as long lasting as ceramic colours. Even though these colours are suitable for use in standard dishwashers, we recommend hand washing. For all senator® mugs with EU origin, only polylux colours can be used.

PMS SERVICE PENS

You can't find your preferred colour in our catalogue products? Then check our PMS service, which will definitely offer you the right option. Simply tell us the PANTONE® number of your preferred colour and we will produce either the pen in its entirety or only specific parts with your preferred tone.

This service does require certain minimum quantities. For details, please refer to the respective product.

In order to give your approval to the PMS service, we send you a sample piece produced with your preferred colour. To achieve an even higher degree of colour security (for example for the clear or frosted surfaces) we can also on request produce a pre-production sample in advance.

Our colour references always refer to the PANTONE® Matching System, however we must point out that the product itself – because of different surfaces, lighting and materials – can differ from the colour tone printed on paper. This is why we cannot accept complaints for such deviations.

SENATOR MIX & MATCH SERVICE.

MIX & MATCH

Customise our pens to fit your corporate design using the senator® Mix & Match Service.

All products marked with the Mix & Match Logo can be mixed in colour and surface.

Contact us. We will be happy to assist you.

Each part can be used in the existing colour and version of the model.

MODEL

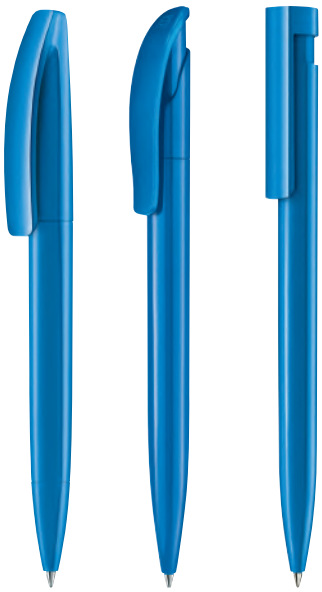
Choose your favourite model from 6 designs and create your own combination.

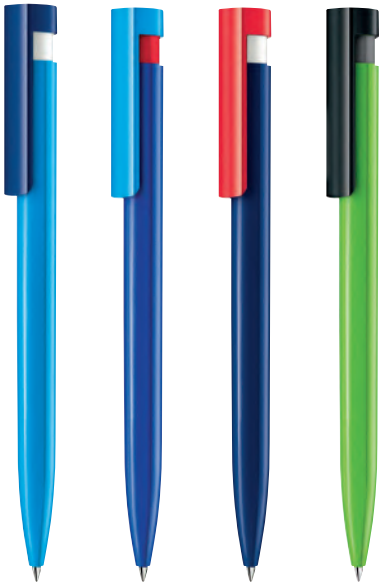
COLOUR

Let your imagination run and mix the standard colours of the model according to your taste.

MATERIAL

You can also mix the materials: All parts of the chosen model can be freely combined and, if available, completed with metal clip and metal tip.





MIX & MATCH MODELS

The senator® Mix & Match Service is available in a wide range for senator® ball pen families. We hold a broad range of surfaces, colours and configurations.

SERVICE

We will happily create a visual for your individual pen if required.

Individually customisable;

sizes and print areas on request

Slip case for all packaging (except packaging P36) including 4c print, also available with single names

Slip case for To Go and Outdoor product packaging including 4c print, also available with single names

BRANDING METHODS PENS

PROMOTIONAL GIFT AWARD 2016

HIGH DEFINITION PRINT

The worldwide unique digital direct print convinces by its brilliance, colour and feel.

Technology:

This printing method delivers a surface like a steel engraved business card on a promotional pen. Instead of a simple, yet absolutely flat image as common print technologies, the senator® high definition print enables a brand experience like you have never seen and felt before.

Strengths:

- Incomparable 3D effect
- Realisation of complex colour gradients
- Accurate reproduction of photorealistic themes
- Reproduction of countless colours

DIGITAL PRINT: CLIP / CAP / BARREL

Our Digital Clip print is the perfect solution to apply multicoloured prints on coloured clips or barrels of our ball pens.

With this method we also place logos very effectively onto the cap of our Liberty models with plastic clips.

Technology:

The digital print uses the CMYK colour printing process to mix all colours from the basic four. For prints on coloured backgrounds we apply an extra layer of white underneath the print.

Strengths:

- Print to the edge of the clip
- Realisation of colour gradients
- Also suitable for photo-realistic themes

SCREEN PRINT

Whenever it comes to branding our ball pen barrels, screen print is the branding method of our choice. The colours used allow a nearly exact reproduction of your corporate colours.

Technology:

Screen print is a direct print process whereby ink is pressed through a mesh onto the ball pen. This process allows a very even ink application.

Strengths:

- Particularly sharp-edged prints
- Large areas printable
- Accurate registration for multicolour prints

TAMPO PRINT

Tampo print is particularly suitable for printing on curved objects. We therefore use this printing method for branding our ball pen clips.

Technology:

Tampo print is an indirect print method whereby ink is transferred from the cliché via a silicone pad onto the surface to be printed. The result is a very even print on curved objects.

Strengths:

- Best suited to print on curved objects
- Suitable for printing on small parts
- Multicolour prints possible

BRANDING METHODS PENS

BARREL PRINT 360°

When it comes to printing all around our cylindrical barrels to use a very large area the Barrel Print 360° is first choice.

As we assemble the ball pen only after the print, the barrel can be fully printed even underneath the clip. Prints with up to 5 colours can be achieved.

Technology:

senator® Barrel Print 360° is a special green printing process undertaken at our factory in Germany. The specialised ink used is exposed to UV light, allowing the ink to dry instantaneously, creating a higher quality print.

Strengths:

- Eye-catching results
- Large printing area
- Perfect customisation

BARREL PRINT 360° PLUS

Barrel Print 360° Plus is the evolution of our Barrel Print 360°. An additional lacquer layer is substituted on top of the print for a high-gloss raised feel effect.

Technology:

The lacquer layer substitutes one colour of the Barrel Print 360° and can be combined with prints of up to 4 colours.

Strengths:

- Raised 3D surface
- Accentuation of selected elements
- Large printing area

METAL PRINT

The surfaces of our metal pens are refined by varnishes, lacquers or other surface coatings.

In order to achieve a good bonding of the ink and wear resistance on these surfaces we use our special Metal print method.

Technology:

Metal print is a direct process whereby special ink is pressed through a mesh onto the ball pen. This process allows a very even ink application.

Strengths:

- Great on varnished surfaces
- Brilliant range of colours

LASER ENGRAVING

A very elegant branding method on metal surfaces. Logos or messages are very accurately and permanently worked into the metal surface.

Technology:

For our laser engraving we use a high precision computer-controlled laser which engraves the surface of our writing instruments and thus expose the metal layer underneath.

Strengths:

- A high-class and modest result
- Strong with fine lines
- Suitable for individual names

REFILLS

senator® magic flow

The refill is a decisive part of the ball pen and contributes considerably to the success of the product. Therefore, when choosing a promotional ball pen, its inner values should be a primary consideration.

A high quality refill ensures a more pleasurable writing experience and guarantees higher levels of exposure and a better economic return for brands.

The **senator® magic flow** refill is one of the best in its class:

- Continuous writing with no spots of ink
- Thanks to a high quality ball and new writing ink in premium quality, this refill offers an extremely smooth and even writing experience
- In two widths:
  1.0 mm for all who prefer a clear and fine line
  1.4 mm for all who like the lines being a bit stronger
- Indelible to ISO-12757-1 + 2 and tested under stringent quality criteria to the highest demands

8062 senator® magic flow X20 refill (1.0 mm)

8004 senator® magic flow G2 refill (1.0 mm)

8080 senator® magic flow G2 refill (1.4 mm)

8068 senator® metal refill, G2

BALL PEN REFILLS

Each senator® ball pen is equipped with the perfectly matching refill. We only use tested and standardised quality refills and guarantee:

- Fixed minimum filling quantities for each refill
- Indelibility to ISO-12757-1 + 2
- Compliance with customary refill systems

1916 Plastic safety rollerball refill

1904 Metal safety rollerball refill

ROLLERBALL REFILLS

A characteristic of our senator® rollerball refill is the long "Cap-Off" time.
A rollerball can easily be left on the table without its cap and will start writing any time.

BRANDING METHODS
PAPERBOOKS / CASES

TAMPOPRINT NOTE / CASE

The fine surface structures of our paper books and cases place high demands on the durability of the printing ink.

In order to guarantee good adhesion and abrasion resistance on these products, we use our "Tampo Print Note".

Technology:

We use a Tampo print with special inks. On our books we can print monochrome in white, red, blue, black and silver.

Strengths:

- Holds on structured surfaces
- Brilliant colours

EMBOSSING

Flexible surfaces such as the outer pages of senator® paper books or our leather case can be discreetly and permanently individualized with blind embossing. This type of finishing requires no colour at all and is therefore particularly noble.

Technology:

The logo is permanently embossed into the material using heat and pressure with the help of a stamp.

Strengths:

- Understated quality
- 3D effect
- Gives company logos real impact

BRANDING METHODS MUGS

DIRECT PRINT

With the Direct Print method we apply the ink directly onto the mug. This saves time and money.

Many of our mug models are suited for up to 4-colour prints, for some models this print method is restricted to 2 colours.

Some print designs cannot be reproduced with the Direct Print method. We will be happy to evaluate your logo prior to printing to make sure this print method is best suited for your project.

The dimensions for the brandings stipulated in the catalogue are valid for most of the logos. Restrictions may occur depending on the logo.

The strengths of this branding technique are:

- Short delivery times
- Cost-effective branding method
- Strong with line prints

TRANSFER PRINT, PARTIAL COVER

Transfer Print is a branding method by which we first print the design on a label to be applied onto the mug in a second step. During the firing process the colour combines with the mug surface, the label dissolves up to a small edge around the print design.

The strengths of this branding technique are:

- Endless variety
- Strong with half-tone prints
- Nearly perfect with colour gradients

TRANSFER PRINT, FULL COVER

The Full Cover version of our transfer print is applied onto a considerably larger area.

For all products that are suited for this large area branding please refer to our product pages in this catalogue.

The strengths of this branding technique are:

- Full cover print
- Perfect customisation method
- Large branding area.

TRANSFER PRINT, FULL COVER CLOSED

Some of our mug models can be branded on an even larger area using the additional area around or underneath the handle.

For all products that are suited for this large area branding please refer to our product pages in this catalogue.

The strengths of this branding technique are:

- Use of the complete area
- Perfect customisation

BRANDING METHODS MUGS

SANDBLASTING

With the Sandblasting method we grind the design direct into the surface giving the logo depth and structure.

The strengths of this branding technique are:

- Striking tactile results
- Perfect for coloured mugs
- Provides depth and structure

LASER ENGRAVING

A computer-controlled laser engraves a logo or imprint into the item ensuring absolute definition and longlasting branding.

The strengths of this branding technique are:

- Understated quality
- Precise reproduction of logos and lettering

SUBLIMATION

The sublimation process uses pressure and heat to transfer the graphic onto a specially coated mug.

We offer this impressive branding method for a total of 9 different mug designs.

The strengths of this branding technique are:

- High colour variety and brilliance
- Photo realistice prints possible
- Already available for small quantities from 36 pieces

COLOUR 4U

Name your requested colour and we dye the outside of your mug to your requirements.

This is possible for all white porcelain and stoneware mugs in our senator® range except for our tableware sets.

The strengths of this branding technique are:

- Sumpremely customisable
- Colour matching on request

GLOSSY IMPRESSION

With this special branding method we treat the frosted glass surface with a special lacquer. This makes the surface clear transparent again resulting in an eye-catching contrast of transparent and frosted surfaces.

The strengths of this branding technique are:

- Patented process
- Unique effects
- Subtle and harmonious

All of our branding methods are suitable for dishwashers. For some branding techniques, such as gold, or our thermo mugs, however, we reommend hand washing.
Should you require further information, please contact your senator® customer service team.

ARTWORK

GENERAL INFORMATION

Please send us your artwork in the below mention file types or send text in on of our standard typefaces.

Please also provide a print sample or proof if possible.

Please send logos and text as vectorised files or as TIF-files with 1200 dpi, in case of photos we require a resolution of 600 dpi. Vectorised logos can be scaled without any loss in quality and are to be preferred against pixel files.

Below mentioned minimum font sizes and minimum line widths are guidelines only. Depending on the motive, branding method or product surface smaller letters and finer lines might be possible or larger letters or bigger lines might be necessary.

Proof samples
To make sure you get the best possible result we recommend the production of a sample for approval. (For production reasons slight colour deviations between a print on paper and a print on other materials are unavoidable).

File formats Mac and PC
Adobe Photoshop CC 2018
Adobe Illustrator CC 2018
Adobe Indesign CC 2018
(Please convert all texts into curves)

Dateiformate PC
Corel Draw X8
(Please convert all texts into curves)

Print positions and dimensions
For all information on print positions and dimensions please refer to the product pages of the catalogue.

PENS

Print colours
With the available colour shade mixing range, all Pantone C and HBP K shades can be mixed. Slight colour shade deviations between paper flags and print are unavoidable on white underground. Major colour shade deviations on an underground of a different colour shade or on a dark-shaded underground must be tolerated.

Digital Print
All colours are mixed in CMYK, so it is not possible to print real PMS colours. In nearly every case the colours will be close to.
Very large, uni coloured surfaces cannot be realised.
Minimum size: 8 pt, minimum line width: 0.15 mm

Personalisation (list of names)
Many of our products can be customised with the personal name. Please send us the names in an excel file.

Raster
Screen print: Raster of 40, colour intensity 15 - 85%.
360° barrel print: Raster of 48, colour intensity 15 -85%.

Standard Typefaces
Arial, AvantGarde, Courier, Futura, Present, Serifa, Helvetica, Times New Roman, Univers each regular, bold, italic, bold italic, BrushScript, English script tye each italic and bold italic. Other typefaces possible (only PC), please send font as True Type-face (*ttf).
Other or similar typefaces on request.

MUGS

Direct Print
On white mugs or glasses

Without trapping in the design:
Minimum size 10 pt, minimum line width 0.2 mm, no raster
With trapping in the design:
Minimum size 10 pt, minimum line width 0.5 mm, no raster

On coloured mugs and glasses a white layer will always have to be layed underneath:
Minimum size 24 pt, minimum line width 0.8 mm, no raster

Transfer print on glass, stainless steel and coloured mugs
Minimum size 12 pt, minimum line width 0.35 mm, printable colour intensity 15 - 85 %

Laser engraving on stainless steel
Minimum size 8 pt, minimum line width 0.2 mm

Laser engraving on coloured mugs
Minimum size 12 pt, minimum line width 0.4 mm

Personalisation (list of names)
A great variety of our mugs can be customised with the personal name. Please send us the names in an excel file. Please note that this very special way of customisation is always possible when the name stands for itself and is not part of the remaining design.

Sandblasting
Minimum size 24 pt, minimum line width 1 mm, no raster

Sublimation
Minimum size: positive 8 pt, negative 10 pt
Minimum line width: positive 0.2 mm, negative 0.3 mm, no raster

Transfer Print
Minimum size 8 pt, minimum line width 0.2 mm, printable colour intensity 15 - 85 %

Valid from Jan. 1, 2019
